Lekki, Lagos

Professional Summary

Software Engineer with 3+ years of experience in technical support, client integration, and building scalable fintech solutions. Proven track record of troubleshooting complex payment processing issues, onboarding enterprise clients, and delivering developer-friendly documentation and tooling.

Skills Summary

- **Languages**: TypeScript, JavaScript, SQL, Python, Bash
- **Frameworks**: React, Nextjs, NodeJS, Express, Redis
- **Tools**: Docker, Kubernetes, GIT, PostgreSQL, MongoDB
- **Platforms**: Linux, Web, Windows, AWS
- **Support**: Client Onboarding, API Integration, Technical Documentation, Issue Triage, Escalation Management
- **Soft Skills**: Communication, Problem-Solving, Leadership, Time Management

Experience

- **Backend Developer, Taja** Lagos, NG
  Oct 2024 - Present
  - **Abuse Detection**: Implemented device fingerprinting and abuse-detection controls to identify impersonation attempts, reducing account takeover incidents by 30%.
  - **Code Review Workflows**: Built monitoring and review workflows that supported code review cadences and mentorship sessions, improving engineering team delivery consistency and code quality.
  - **Query Optimization**: Optimized SQL queries and database indexes to reduce average database request latency by 20%.
  - **Admin Dashboard**: Developed an admin dashboard for internal operations workflows, helping increase organizational productivity by 50% through faster task handling and reporting.
- **Software Engineer (contract), Kite** Lagos, NG
  Oct 2025 - May 2026
  - **Unified API Layer**: Architected a unified API layer around major payment providers, consolidating complex financial rails into a single high-performance interface used by multiple client applications.
  - **Team Leadership**: Led a team of 2 engineers, defining the technical roadmap, code-review standards, and quarterly planning process while maintaining 99.9% system uptime.
  - **Regression Testing**: Introduced automated regression testing across critical payment flows, cutting production bug escapes by over 50% in the first quarter.
  - **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with the unified backend API.
  - **UI Components**: Translated financial data flows into responsive UI components, improving onboarding and transaction completion experiences for users.
- **Software Engineer / Technical Support, LocalRamp** Lagos
  May 2023 - Nov 2024
  - **Client Integration Support**: Provided end-to-end technical support for enterprise clients integrating the fiat-to-crypto gateway, troubleshooting API connectivity, webhook delivery, and payment processing issues across 300+ active integrations.
  - **Technical Documentation**: Authored developer-friendly API documentation, integration guides, and troubleshooting runbooks that reduced client onboarding time by 40% and lowered recurring support ticket volume by 25%.
  - **Issue Triage & Escalation**: Established a structured issue triage and escalation workflow, categorizing and prioritizing client-reported bugs by severity, reducing average resolution time from 48 hours to under 12 hours.
  - **Fiat-to-Crypto Gateway**: Led end-to-end development of a fiat-to-crypto gateway processing millions in monthly transaction volume, with PCI-DSS compliance and KYC/AML integration.
  - **Client Retention**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in client retention through proactive issue identification.
  - **CI/CD Optimization**: Reduced CI/CD pipeline duration by 20% by streamlining build and deployment stages, and authored API design standards that cut new engineer onboarding time by 40%.

Projects

- **RateLimitr (TypeScript, Fastify, Redis, TimescaleDB) – 2024**: Distributed rate-limiting service with 4 pluggable algorithms and atomic Redis Lua operations — 10,000+ RPS with zero race conditions across 50+ nodes. Multi-tenant architecture for 10,000+ concurrent tenants with hot-swappable strategies and TimescaleDB-powered real-time analytics.
- **Synapse (TypeScript, Express, MongoDB, Redis)**: Architected a multi-tenant payment API integrating 3+ providers via adapter pattern for virtual accounts, KYC, and cross-border payouts. Implemented async processing with RabbitMQ/Bull and secured with JWT, rate limiting, and structured logging.

Education

- **Alex Ekwuememe Federal University, Ebonyi State, Abakaliki** Ebonyi, Nigeria
  Bachelor of Science - Computer Science; GPA: 3.5 *Jan 2021 - Oct 2025*
  Courses: *Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases*
