Professional Summary

Frontend Engineer with 5+ years of experience building high-performance, accessible fintech products with React, Next.js, and TypeScript. Built and shipped fintech products including fiat-to-crypto platforms and real-time dashboards adopted by 300+ enterprise clients. Skilled at turning complex financial data flows into fast, reliable, user-friendly experiences.

Skills

- **Languages**: TypeScript, JavaScript, HTML, CSS, SQL
- **Frameworks**: React, Next.js, Tailwind CSS, Redux, TanStack Query, React Router, Vite, State Management
- **Data & APIs**: GraphQL, REST
- **Testing**: Jest, Vitest, React Testing Library, Playwright, Cypress
- **Tools**: Docker & Kubernetes, CI/CD, Redis, MongoDB
- **Practices**: Accessibility (WCAG/ARIA), Responsive Design, Performance Optimization, Core Web Vitals, Design Systems, Cross-Browser Testing, Agile / Scrum, System Design
- **AI & ML**: LLM APIs, Natural-Language Interfaces, Prompt Engineering

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **API & Performance Optimization**: Collaborated with frontend and UI engineers to define data contracts and optimize data-fetching patterns and API responses, cutting client-side request latency by 20% and delivering faster, more responsive interfaces across web and mobile products.
- **Secure Authentication**: Integrated secure authentication flows and encrypted local storage, ensuring strict data privacy and seamless app-unlock experiences for users.
- **Developer Experience**: Built internal tools and monitoring workflows that helped frontend and ops teams ship faster and debug issues in production.

Frontend Developer (contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with the unified backend API.
- **UI Components**: Translated financial data flows into responsive UI components, improving onboarding and transaction completion experiences for users.
- **Secure Mobile UX**: Designed secure mobile UX patterns with encrypted local storage and consistent authentication states across app-launch and unlock flows, preserving data privacy without disrupting the user experience.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Fiat-to-Crypto Gateway**: Led the frontend development of a high-volume, secure fiat-to-crypto gateway processing millions in monthly transaction volume, fully compliant with PCI-DSS standards and integrated with KYC/AML user verification workflows.
- **Accessibility**: Brought onboarding and payment flows to WCAG 2.2 AA compliance with ARIA labelling and full keyboard navigation, improving usability across assistive technologies.
- **Analytics Dashboard**: Built a real-time analytics dashboard for operations teams and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **UX Collaboration**: Collaborated with UX designers to improve interface layouts, increasing user adoption by 12%.

Frontend Engineer / Full Stack Developer *Jan 2022 - Nov 2024*
payouts.cash *Lagos, NG*

- **Fiat-to-Crypto UI**: Built and shipped the frontend of the 2022 payouts.cash platform (Naira - USDT/BTC conversions and payment links) with React and TypeScript.
- **User Flows**: Implemented buy/sell flows, order tracking, and verification screens with a focus on clarity, validation, and error handling for financial transactions.
- **Full-Stack Collaboration**: Paired with backend logic to design API contracts, handle webhooks, and display real-time order states to ensure reliable end-to-end flows.
- **Reliability & UX**: Improved error messaging and status tracking for failed/pending transactions based on support feedback, reducing user confusion and support volume.

Projects

RateLimitr

- Led the frontend architecture and interface design for an enterprise-grade rate-limiting platform handling 10,000+ RPS across 50+ nodes, and built an AI-powered natural-language analytics assistant that answers tenant questions about their real-time usage with plain-English insights.

LocalRamp Web Wallet

- Shipped frontend features for a PCI-DSS-compliant fiat-to-crypto wallet, including onboarding flows, transaction history views, and embeddable payment widgets used by enterprise clients.

Education

Alex Ekwuememe Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

Certifications

- **HackerRank**: Frontend Developer (React) • E4382188F72A & Software Engineer • AE666AC16F1C • Oct 2026 • verify
