Professional Summary

Full Stack Developer with 3+ years building and operating modern microservice applications in Agile/Scrum, DevOps environments. Strong across React on the front end and Node.js, MongoDB, and SQL databases on the back end, with hands-on experience containerizing services on AWS and Azure. Comfortable building the infrastructure that runs data- and AI-driven services, from schema and API design through deployment, monitoring, and support.

Skills

- **Languages**: TypeScript, JavaScript, SQL, Python, Bash
- **Frontend**: React, Next.js, Redux, TanStack Query, Tailwind CSS, HTML5, CSS3, Responsive Design
- **Backend**: Node.js, Express.js, Fastify, REST APIs, GraphQL, Microservices, Event-Driven Architecture, Authentication
- **Data**: MongoDB, MySQL, PostgreSQL, DynamoDB, Redis, Schema Design, Query Optimization
- **Cloud & DevOps**: AWS (S3, EC2), Azure, Docker, Kubernetes, CI/CD, Jenkins, Git/GitHub, Linux
- **Observability**: Log Analysis, Prometheus, Grafana, Sentry, Datadog, Performance Optimization, Agile/Scrum

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Microservices & APIs**: Built and shipped features end to end across React front ends and Node.js microservices, with event-driven services, message queues, and provider-agnostic integrations.
- **Cloud & Containers**: Containerized services with Docker, deployed to AWS and Azure, and maintained CI/CD pipelines and automated tests in a DevOps workflow.
- **Data Layer**: Designed and optimized schemas across MongoDB, PostgreSQL, and Redis, and cut average request latency by 20% through query and index tuning.
- **AI & Analytics**: Built data-heavy features and an AI/LLM-powered assistant over live usage data, optimizing data-fetching patterns and response structures for scale.
- **Agile Delivery**: Participated in Agile ceremonies and code reviews, and monitored production services with logging, metrics, and alerting to improve reliability.

Software Engineer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Service Architecture**: Architected a unified API layer consolidating multiple providers into a single interface used by several client applications, with event-based communication between services.
- **Full-Stack Delivery**: Co-developed a cross-platform React frontend with state management and real-time synchronization against the backend API.
- **Reliability & DevOps**: Improved reliability to 99.9% uptime and reduced repeat incidents by over 50% through automated regression checks and systematic production investigation.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Platform Development**: Led end-to-end development of a payments platform handling millions in monthly volume, from schema and API design through deployment and support.
- **Cloud & Database**: Deployed containerized services on AWS and GCP with CI/CD, and designed relational schemas and tuned MySQL/PostgreSQL queries for high-traffic workloads.
- **Frontend & Analytics**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ enterprise clients, improving retention by 18%.
- **Standards & Process**: Reduced CI/CD pipeline duration by 20% and authored API design standards that cut new engineer onboarding time by 40%.

Projects

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payments API integrating 3+ providers via an adapter pattern for virtual accounts, KYC, and cross-border payouts. Secured with JWT, rate limiting, and structured logging.

RateLimitr (TypeScript, React, Fastify, Redis, TimescaleDB) *2024*

- Distributed multi-tenant rate-limiting service handling 10,000+ RPS across 50+ nodes, with a React dashboard, real-time analytics, and an LLM-powered assistant over live usage data.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5
