Professional Summary

Frontend Developer with 3+ years building enterprise-grade React and TypeScript interfaces, including Tailwind CSS design systems and migrations away from legacy CSS frameworks. Strong visual design sensibility and modern CSS methodology, with a track record of questioning existing UI implementations and proposing thoughtful, use-case-driven improvements. Comfortable working directly with product teams to understand an existing application and ship iterative improvements, and available to overlap with US Eastern time.

Skills

- **Languages**: TypeScript, JavaScript, HTML5, CSS3/SCSS
- **Frameworks**: React, Next.js, Tailwind CSS, Redux, React Router, TanStack Query, Bootstrap
- **CSS & Design**: Utility-First CSS, Design Tokens, Component Variants, Responsive Layouts, Flexbox/Grid, Theming, Dark Mode, Cross-Browser Styling
- **UI/UX**: Visual Design, Design Systems, Component Libraries, Accessibility (WCAG/ARIA), Figma Handoff, Usability Review
- **Enterprise**: B2B Dashboards, Data-Heavy Tables, Complex Forms, Multi-Step Workflows, Legacy UI Migration, Performance & Core Web Vitals
- **Workflow**: Git/GitHub, Code Review, Automated Testing, CI/CD, Vite/Webpack, Agile Collaboration, Remote/Distributed Teams

Experience

Frontend / Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Tailwind Design System**: Built and maintained a Tailwind CSS component system with variant-driven, reusable UI primitives, standardizing spacing, typography, and color tokens across a B2B platform.
- **Iterative UI Improvement**: Partnered with product to review existing screens, question outdated patterns, and ship iterative UX improvements to data-heavy dashboards, tables, and multi-step forms.
- **Legacy Framework Migration**: Refactored legacy Bootstrap-based screens into clean React/TypeScript components with Tailwind utilities, improving responsiveness and reducing CSS conflicts.
- **Accessibility & Performance**: Brought interfaces to consistent WCAG alignment with semantic markup, keyboard navigation, and ARIA labelling, while tuning render and layout performance for Core Web Vitals.
- **Cross-Functional Delivery**: Turned Figma designs into production components and collaborated with designers, product, and backend engineers to deliver features end to end.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Responsive, Accessible UI**: Translated complex financial data flows into responsive, accessible interfaces with Tailwind CSS, improving onboarding and transaction completion.
- **Reusable Component Layer**: Built a shared component library with consistent design tokens and states, reducing duplicate styling and speeding up feature delivery across screens.
- **Design Collaboration**: Worked directly with designers to refine layouts, spacing, and interaction patterns, iterating quickly on feedback.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Enterprise B2B Interface**: Led frontend development of a high-volume payments platform used by 300+ enterprise clients, owning its visual design, layout system, and component standards.
- **Analytics Dashboard**: Designed and built a real-time analytics dashboard and embeddable widget adopted by 300+ clients, contributing to an 18% improvement in retention.
- **Accessibility & Adoption**: Brought onboarding and payment flows to WCAG 2.2 AA compliance and improved layouts with UX designers, increasing adoption by 12%.

Projects

RateLimitr (React, TypeScript, Tailwind CSS, Fastify, Redis) *2024*

- Designed and built the Tailwind-based UI for a multi-tenant platform, including real-time analytics views and an AI natural-language assistant over live usage data.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
