Professional Summary

B2B Technical Support Engineer with 3+ years of experience supporting enterprise clients on high-volume, multi-tenant platforms. Skilled in diagnosing complex application issues using microservice logs, read-only SQL, REST API and webhook analysis, and browser DevTools. Known for SLA-driven ticket handling, clear reproduction-ready Jira escalations, and runbooks that reduce repeat tickets.

Skills Summary

- **Support & Ticketing**: Jira / Jira Service Management, Zendesk, Intercom, Confluence, SLA management, L2 triage, escalation, runbooks
- **Diagnostics & Monitoring**: Kibana, OpenSearch, Sentry, Grafana, Datadog, PagerDuty, Browser DevTools, trace analysis
- **APIs & Data**: REST APIs, HTTP status codes, JSON, webhooks, Postman, cURL, SQL (PostgreSQL, MySQL), MongoDB, read-only queries
- **Notifications & Platforms**: Push, SMS, Email / SMTP troubleshooting; Linux, AWS, Docker, Windows, macOS
- **Languages**: English (fluent), Yoruba (native)

Experience

Backend Engineer *Oct 2024 - Present*
Taja *Lagos, NG*

- **B2B Partner Support**: Supported enterprise partners integrating payment and identity-verification APIs, investigating connectivity, webhook delivery, and transaction failures and driving them to first resolution within SLA.
- **Log & Root-Cause Analysis**: Traced production failures across microservices using structured logs, correlation IDs, and Sentry/Grafana dashboards, isolating root cause before escalating to engineering.
- **API Diagnostics**: Reproduced issues with Postman and cURL, inspected request/response JSON and HTTP status codes, and verified webhook retries and delivery to client endpoints.
- **Escalation & Documentation**: Prepared reproduction-ready Jira tickets with raw payloads, log snippets, and SQL evidence; documented recurring fixes in runbooks that reduced repeat tickets.

Software Engineer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Application Troubleshooting**: Debugged cross-platform application issues reported by users, isolating state-management and real-time synchronization failures against backend APIs using logs and DevTools.
- **QA & Regression Testing**: Introduced automated regression testing across critical payment flows, cutting production bug escapes by over 50% in the first quarter.
- **Client Collaboration & Documentation**: Worked with support and operations teams to reproduce and ship production fixes while maintaining 99.9% uptime; authored troubleshooting guides and developer documentation that helped client teams resolve issues faster.

B2B Technical Support / Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **B2B Ticket Processing**: Investigated L2 requests from 300+ enterprise clients on a multi-tenant platform, covering user journeys, trigger events, promotional campaign parameters, segmentation settings, and configuration changes.
- **Data & Parameter Verification**: Used read-only SQL and internal admin panels to check user activity states, event records, campaign parameters, and bonus/configuration states, separating data issues from platform defects.
- **Log, API & Delivery Diagnostics**: Located root causes by searching microservice logs with User IDs, transaction/campaign IDs, and correlation keys; reproduced API and webhook failures with Postman and cURL, validating payloads, status codes, retries, and authentication; used Browser DevTools to troubleshoot frontend errors.
- **Escalation, SLA & Knowledge Base**: Prepared reproduction-ready Jira reports for engineering with raw payloads, SQL records, and log snippets, reducing average resolution time from 48 hours to under 12 hours; authored runbooks and checklists that cut onboarding time by 40% and recurring tickets by 25%.
- **Mentorship**: Guided junior technicians on ticket triage, log searches, evidence collection, and escalation standards, improving first-pass resolution quality across the team.

Projects

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payment API integrating 3+ providers; added structured logging, correlation IDs, and webhook retries so support teams could trace and diagnose failures end to end.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Relevant Coursework**: Operating Systems, Networking, Databases, Data Structures, Algorithms
