Professional Summary

Full-Stack Product Engineer with 3+ years of experience building and owning enterprise B2B web applications end to end. Strong in TypeScript, React/Next.js, Node.js/Express, and SQL, with hands-on experience delivering data-heavy dashboards, admin workflows, self-service surfaces, and API integrations. Known for translating complex platform capabilities into usable interfaces, maintaining quality through automated testing and accessibility, and collaborating closely with product, design, and client stakeholders.

Skills

- **Languages**: TypeScript, JavaScript, SQL, HTML, CSS
- **Frontend**: React, Next.js, Tailwind CSS, Redux, TanStack Query, Vite, Design Systems, Component Libraries, Accessibility (WCAG/ARIA)
- **Backend & APIs**: Node.js, Express.js, REST API Design, GraphQL, Authentication, Webhooks, Service Integration
- **Data & Cloud**: PostgreSQL, MySQL, MongoDB, Redis, Schema Design, Query Optimization, AWS, Docker, Kubernetes, CI/CD
- **AI & Quality**: LLM APIs, Prompt Engineering, Structured Evaluations, AI-Assisted Development (GitHub Copilot, Cursor); Jest, Vitest, React Testing Library, Playwright, Cypress, Sentry
- **Collaboration**: Product/Design Partnership, Client-Facing Delivery, Technical Documentation, Cross-Team Communication, Agile/Scrum

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **End-to-End Product Delivery**: Built and shipped full-stack features across React/Next.js interfaces and Node.js/Express APIs, owning work from customer problem through production deployment.
- **API & Service Integration**: Designed data contracts and integrated platform APIs, optimizing data-fetching patterns and response structures to cut client-side latency by 20%.
- **Secure Authentication**: Integrated secure authentication flows and encrypted local storage, ensuring strict data privacy and seamless app-unlock experiences for users.
- **Quality & Production Support**: Built internal tools and monitoring workflows that helped frontend and operations teams ship faster, debug production issues, and maintain reliability.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with a unified backend API.
- **Complex UI Workflows**: Translated complex financial data flows into responsive, accessible UI components, improving onboarding and transaction completion experiences.
- **Quality & Testing**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50%; verified fixes in demo environments.
- **Client Collaboration & Documentation**: Worked with support and operations teams to reproduce and resolve production issues; authored troubleshooting guides and developer documentation.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Enterprise B2B Platform**: Led frontend development of a high-volume, PCI-DSS-compliant payments platform used by 300+ enterprise clients, integrating KYC/AML verification workflows.
- **Admin & Analytics Experiences**: Built a real-time analytics dashboard for operations teams and an embeddable self-service widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **Full-Stack & API Ownership**: Designed and maintained RESTful APIs, integrated payment and identity providers with automatic failover, and optimized SQL queries and schemas to improve response times by 20%.
- **Accessibility & Design Collaboration**: Brought onboarding and payment flows to WCAG 2.2 AA compliance with ARIA labelling and keyboard navigation; partnered with UX designers to improve layouts, increasing adoption by 12%.
- **Client-Facing Delivery**: Partnered with enterprise clients and internal teams to scope configuration needs, validate workflows, and translate feedback into product improvements.

Projects

RateLimitr (TypeScript, React, Fastify, Redis, TimescaleDB) *2024*

- Led frontend architecture for a full-stack rate-limiting platform handling 10,000+ RPS across 50+ nodes, and built an AI-powered natural-language analytics assistant. Designed prompt workflows and evaluated responses against representative tenant queries to improve answer accuracy.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
