Professional Summary

Full-Stack Web Developer with 3+ years of experience building and maintaining production web applications with React, Next.js, Node.js, GraphQL, and PostgreSQL. Experienced in delivering responsive, accessible interfaces, writing unit and integration tests, participating in code reviews, and collaborating with product and design teams in remote environments. Motivated by clean, maintainable code and by using technology to improve people's daily work.

Skills

- **Languages**: TypeScript, JavaScript, SQL, HTML, CSS
- **Frontend**: ReactJS, Next.js, Tailwind CSS, Redux, TanStack Query, Responsive Design, Accessibility (WCAG/ARIA), Design Systems
- **Backend & APIs**: Node.js, Express.js, GraphQL, REST APIs, Authentication, Webhooks, Service Integration
- **Data**: PostgreSQL, MySQL, MongoDB, Redis, Relational Schema Design, Query Optimization
- **Testing & Quality**: Jest, Vitest, React Testing Library, Playwright, Cypress, Unit/Integration Testing, Code Review, CI/CD
- **Tools**: Git/GitHub, Docker, AWS, Sentry, Postman, VS Code, GitHub Copilot, Cursor, Linear/Jira

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Full-Stack Feature Development**: Built and maintained web features across React/Next.js frontends and Node.js/Express backends, from concept through production deployment, with a focus on clean, maintainable code.
- **API & Performance Optimization**: Designed data contracts and integrated platform APIs, optimizing data-fetching patterns and response structures to cut client-side latency by 20%.
- **Testing & Code Quality**: Wrote unit and integration tests, reviewed code, and built monitoring workflows that helped the team ship faster and investigate production bugs proactively.
- **Product & Design Collaboration**: Partnered with product managers and designers to scope features, validate workflows with users, and iterate quickly on feedback across the stack.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with a unified backend API.
- **Responsive & Accessible UI**: Translated complex financial data flows into responsive, accessible UI components, improving onboarding and transaction completion experiences.
- **Testing & Bug Fixes**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50%; investigated and fixed issues across the stack.
- **Collaboration & Documentation**: Worked with support and operations teams to reproduce and resolve production issues; authored troubleshooting guides and developer documentation.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Full-Stack Platform Delivery**: Led frontend development of a high-volume, PCI-DSS-compliant payments platform used by 300+ enterprise clients, and designed and maintained REST APIs with payment and identity-provider integrations.
- **Database & Performance**: Optimized PostgreSQL queries and schemas and integrated providers with automatic failover, improving response times by 20% and maintaining reliable production operations.
- **Analytics Dashboard**: Built a real-time analytics dashboard for operations teams and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **Accessibility & UX**: Brought onboarding and payment flows to WCAG 2.2 AA compliance with ARIA labelling and keyboard navigation; partnered with UX designers to improve layouts, increasing adoption by 12%.
- **CI/CD & Team Knowledge**: Reduced CI/CD pipeline duration by 20%, authored API design standards, and contributed to code reviews and onboarding materials that cut new engineer onboarding time by 40%.

Projects

RateLimitr (TypeScript, React, Fastify, PostgreSQL/TimescaleDB, Redis) *2024*

- Led frontend architecture for a full-stack rate-limiting platform handling 10,000+ RPS across 50+ nodes, built with React, Fastify, PostgreSQL/TimescaleDB, and Redis. Added real-time analytics and an AI-powered natural-language assistant for tenant usage insights.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
