Professional Summary

Software Developer with 3+ years of experience designing, building, and deploying production applications across the stack. Strong in JavaScript and TypeScript, RESTful API design, SQL query optimization, and front-end development with modern frameworks. Experienced deploying to cloud environments, working on Linux and Windows platforms, maintaining code through Git-based version control, and collaborating across teams to turn requirements into reliable, well-documented systems.

Skills

- **Languages**: JavaScript, TypeScript, Python, SQL, Bash
- **Frontend**: React, Next.js, Redux, Tailwind CSS, HTML5, CSS3, Responsive Design, Accessibility
- **Backend & APIs**: Node.js, Express.js, Fastify, RESTful APIs, GraphQL, Microservices, Authentication, Webhooks
- **Databases**: MySQL, SQL Server, PostgreSQL, MongoDB, Redis, Schema Design, Query Optimization
- **Cloud & Systems**: AWS, Azure, Docker, Kubernetes, CI/CD, Linux, Windows, VBA Automation
- **Version Control & Tools**: Git, GitHub, SVN, Code Review, Postman, Sentry, Grafana, Jira, Agile/Scrum

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Application Development**: Designed, developed, and deployed full-stack features in JavaScript/TypeScript across React front ends and Node.js services, shipping to production continuously.
- **API Design & Integration**: Built and maintained RESTful and GraphQL APIs enabling integration between payment, identity, and internal systems, with clear contracts and error handling.
- **SQL & Performance**: Optimized SQL queries, indexes, and schema design across MySQL, SQL Server, and PostgreSQL, cutting average request latency by 20% and improving reliability.
- **Cloud Deployment & Security**: Deployed and operated services on AWS and Azure with CI/CD pipelines and containerization, applying authentication and least-privilege access across Linux and Windows hosts.
- **Version Control & Collaboration**: Maintained code integrity in Git/GitHub and SVN across active repositories, and gathered requirements with product and operations teams, translating them into technical specifications.

Software Engineer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Systems**: Architected a unified API layer consolidating multiple payment providers into a single reliable interface used by several client applications.
- **Code Review & Quality**: Led a team of 2 engineers, running code reviews, defining technical standards, and improving reliability to 99.9% uptime.
- **Troubleshooting & Reliability**: Diagnosed and fixed production issues across front end, back end, and integrations, reducing repeat incidents by over 50% through automated regression checks.
- **Documentation & Support**: Wrote developer and operations documentation and provided ongoing support for existing applications across Linux and Windows environments, including SQL Server reporting queries.

Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **End-to-End Delivery**: Led development of a fiat-to-crypto gateway processing millions in monthly volume, from requirements through deployment and support.
- **Database & Query Optimization**: Designed relational schemas in MySQL and SQL Server and tuned queries, improving response times by 20% on high-traffic transactional workloads.
- **Cloud & Automation**: Deployed applications to AWS and Azure, configuring environments and monitoring across Linux and Windows servers, and wrote VBA automation scripts that eliminated recurring manual reporting tasks.
- **Front-End & Analytics**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ enterprise clients, improving retention by 18%.
- **Process Improvement**: Reduced CI/CD pipeline duration by 20% by streamlining build and deployment stages and authored API design standards that cut onboarding time by 40%.

Projects

RateLimitr (TypeScript, Fastify, Redis, PostgreSQL/TimescaleDB) *2024*

- Distributed multi-tenant rate-limiting service handling 10,000+ RPS across 50+ nodes using atomic Redis Lua operations, with real-time analytics and an LLM-powered assistant for tenant usage insights.

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payment API integrating 3+ providers via an adapter pattern for virtual accounts, KYC, and cross-border payouts. Secured with JWT, rate limiting, and structured logging.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
