Professional Summary

Front-End Engineer with 3+ years building TypeScript and React applications, including production Web3 and payments products. Strong command of Next.js, component design, and responsive, performant interfaces, with hands-on experience integrating blockchain wallets, ethers.js, and on-chain/payment flows. Comfortable building and maintaining production-grade SDKs, APIs, and systems at scale in fast-paced, distributed, multi-disciplinary teams.

Skills

- **Languages**: TypeScript, JavaScript, Solidity (working knowledge), SQL, Bash
- **Frontend**: React, Next.js, Redux, TanStack Query, React Router, Tailwind CSS, HTML5, CSS3, Responsive & Mobile-First Design
- **Web3**: ethers.js, wagmi, viem, Wallet & Provider Integration, On-Chain Reads/Writes, Smart Contract Interaction, Web3 Auth
- **APIs & SDKs**: REST APIs, GraphQL, production SDK design, Adapter Patterns, Webhooks, Message Queues, Event-Driven Services
- **Data**: PostgreSQL, MongoDB, Redis, Schema Design, Query Optimization
- **Workflow**: Git/GitHub, Code Review, Documentation, Automated Testing (Jest, Vitest, Playwright), CI/CD, Docker, Agile/Remote Teams

Experience

Frontend / Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Web3 / Payments Frontend**: Built TypeScript and Next.js interfaces for blockchain and payment flows, integrating wallet connections, ethers.js, and on-chain/off-chain data into intuitive, mobile-responsive experiences.
- **Component System & UX**: Built a reusable Tailwind component system and refined interactions with product, prioritizing intuitive, performant, pixel-consistent UI across screens.
- **APIs & SDKs**: Designed and consumed REST/GraphQL APIs and provider-agnostic SDK adapters with automatic failover, integrating third-party services reliably.
- **Quality & Documentation**: Wrote tests, reviewed code, and documented components and integration decisions to keep standards high and onboarding fast.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Interface**: Co-developed a cross-platform frontend with state management and real-time synchronization against a unified backend API.
- **Responsive & Accessible UI**: Translated complex financial data flows into responsive, accessible components, improving onboarding and transaction completion.
- **Performance & Reliability**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50% and maintaining 99.9% uptime.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Fiat-to-Crypto Product**: Led frontend development of a fiat-to-crypto gateway handling millions in monthly volume, integrating wallet and payment rails into a production product used by 300+ clients.
- **Analytics Dashboard**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ enterprise clients, improving retention by 18%.
- **Standards & Performance**: Brought flows to WCAG 2.2 AA compliance, improved layouts with UX designers, and authored API standards that cut onboarding time by 40%.

Projects

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payments API integrating 3+ providers via an adapter pattern for virtual accounts, KYC, and cross-border payouts. Secured with JWT, rate limiting, and structured logging.

RateLimitr (React, TypeScript, Tailwind, Fastify, Redis) *2024*

- Full-stack platform with a responsive React UI handling 10,000+ RPS across 50+ nodes, including real-time analytics and an AI natural-language assistant over live usage data.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5
