Lagos, NG

Professional Summary

Full-Stack Software Engineer with 5+ years of experience designing low-latency microservices and mission-critical web applications. Proven in leading small engineering squads, building distributed rate-limiting systems at 10k+ RPS, and delivering complex API integrations and AI-powered analytics for fintech products.

Skills Summary

- **Languages**: Rust, TypeScript, JavaScript, SQL, Bash
- **Frameworks**: React, Next.js, Node.js, Bun, Fastify, Express, Redux
- **Data & APIs**: GraphQL, REST, JWT, Redis, MongoDB, TimescaleDB
- **Testing**: Jest, Vitest, React Testing Library, Playwright, Cypress
- **Tools**: Kubernetes, Docker, CI/CD, PostgreSQL, MySQL, Sentry, Grafana
- **Platforms**: Linux, AWS, Serverless
- **AI & ML**: LLM APIs, Prompt Engineering, Natural-Language Interfaces, Agentic Workflows
- **Developer Tooling**: SDK & CLI Development, OpenAPI/Swagger
- **Soft Skills**: Leadership, Communication, Problem-Solving, Time Management

Experience

Backend Engineer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Abuse Detection**: Implemented device fingerprinting and abuse-detection controls to identify impersonation attempts, reducing account takeover incidents by 30%.
- **Query & Database Design**: Optimized SQL queries, database indexes, and schema design to cut average request latency by 20% while improving data integrity across core fintech features.
- **Third-Party Integrations**: Integrated external APIs for payments and identity verification, building provider-agnostic abstraction with automatic failover that routes requests to backup providers when any single service fails, ensuring uninterrupted uptime.
- **Admin Dashboard**: Developed an admin dashboard for internal operations workflows, helping increase organizational productivity by 50% through faster task handling and reporting.

Software Engineer (contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Unified API Layer**: Architected a unified API layer around major payment providers, consolidating complex financial rails into a single high-performance interface used by multiple client applications.
- **Team Leadership**: Led a team of 2 engineers, defining the technical roadmap, code-review standards, and quarterly planning process while maintaining 99.9% system uptime.
- **Regression Testing**: Introduced automated regression testing (Jest) across critical payment flows, cutting production bug escapes by over 50% in the first quarter.
- **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend alongside the backend, implementing state management and real-time sync while translating financial data flows into responsive UI components that improved onboarding and transaction completion.

Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Fiat-to-Crypto Gateway**: Led end-to-end development of a fiat-to-crypto gateway processing millions in monthly transaction volume, with PCI-DSS compliance and KYC/AML integration.
- **Analytics Dashboard**: Built a real-time analytics dashboard for operations teams and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **CI/CD Optimization**: Reduced CI/CD pipeline duration by 20% by streamlining build and deployment stages, and authored API design standards that cut new engineer onboarding time by 40%.

Full Stack Software Engineer *Jan 2022 - Nov 2024*
payouts.cash *Lagos, NG*

- **End-to-End Build**: Built both the frontend and backend for the 2022 version of payouts.cash (Naira ¡-¿ crypto exchange and payment links) from scratch.
- **Product Features**: Shipped order creation, quote/rate calculation, payment status tracking, and merchant payment link generation.
- **Payments Infrastructure**: Implemented REST APIs, webhook processing, transaction persistence, and admin/support tools to safely operate the platform.
- **Support-Aware Engineering**: Drove fixes for real user issues (failed payouts, bank details, order states) leveraging both frontend and backend ownership.

Projects

RateLimitr (TypeScript, Fastify, Redis, TimescaleDB) *2024*

- Distributed multi-tenant rate-limiting service handling 10,000+ RPS across 50+ nodes using atomic Redis Lua operations, with real-time analytics via TimescaleDB and an LLM-powered assistant that answers tenant questions in plain English.

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payment API integrating 3+ providers via adapter pattern for virtual accounts, KYC, and cross-border payouts. Secured with JWT, rate limiting, and structured logging.

Education

Alex Ekwuememe Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5 *Jan 2021 - Oct 2025*

- **Courses**: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

Certifications

- **HackerRank**: Software Engineer • Oct 2026 • Credential ID: AE666AC16F1C • verify
