Professional Summary

Technical Support Engineer with 5+ years of experience supporting enterprise fintech clients, troubleshooting API and payment issues, and driving integrations to resolution. Skilled in diagnosing API/webhook failures, triaging and escalating incidents by severity, and delivering developer documentation and runbooks that reduce ticket volume and onboarding time.

Skills Summary

- **Support & Tools**: Ticketing (Zendesk/Intercom/Jira), Monitoring & Alerting (Sentry, Grafana, Datadog, PagerDuty), API Testing (Postman, cURL, Webhooks, OpenAPI/Swagger), Knowledge Base & Documentation (Confluence, Notion, Runbooks)

- **Languages**: TypeScript, JavaScript, SQL, Python, Bash
- **Frameworks**: Node.js, Express, React
- **Data**: PostgreSQL, MongoDB (querying and debugging transaction data)
- **Platforms**: Linux, AWS, Docker, Windows
- **Soft Skills**: Communication, Problem-Solving, Leadership, Time Management

Experience

Backend Engineer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Client & Partner Support**: Supported enterprise partners integrating payment and identity-verification APIs, diagnosing connectivity and webhook delivery issues and driving them to first resolution.
- **API Diagnostics & Failure Handling**: Identified failing payment and identity providers and routed requests to backup providers via automatic failover, minimizing downtime across live integrations.
- **Monitoring & Incident Response**: Maintained production monitoring, alerting, and incident triage workflows (Sentry, Grafana, PagerDuty), reducing mean time to detect and resolve client-facing incidents.
- **Escalation & Documentation**: Owned the escalation path from first report to fix, documenting root causes in runbooks that cut repeat tickets and improved support-team resolution speed.

Software Engineer (contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **API Testing & QA**: Introduced automated regression testing across critical payment flows, verifying APIs and cutting production bug escapes by over 50% in the first quarter.
- **Client-Facing Troubleshooting**: Debugged cross-platform app issues reported by users, investigating state management and real-time synchronization failures against the unified backend API.
- **Technical Documentation**: Developed developer-focused documentation and troubleshooting guides that helped client and ops teams onboard faster and resolve issues in production.
- **Support Engineering Collaboration**: Worked with support and ops teams to reproduce, diagnose, and ship fixes for production and client-reported issues, maintaining 99.9% system uptime.

Software Engineer / Technical Support *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Client Integration Support**: Provided end-to-end technical support for enterprise clients integrating the fiat-to-crypto gateway, troubleshooting API connectivity, webhook delivery, and payment processing issues across 300+ active integrations.
- **Technical Documentation**: Authored developer-friendly API documentation, integration guides, and troubleshooting runbooks that reduced client onboarding time by 40% and lowered recurring support ticket volume by 25%.
- **Issue Triage & Escalation**: Established a structured issue triage and escalation workflow, categorizing and prioritizing client-reported bugs by severity, reducing average resolution time from 48 hours to under 12 hours.
- **Client Retention**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in client retention through proactive issue identification.

Technical Support Engineer / Full Stack Developer *Jan 2022 - Nov 2024*
payouts.cash *Lagos, NG*

- **User & Transaction Support**: Provided front-line technical support for Naira ¡-¿ crypto conversions (USDT/BTC), resolving order failures, incorrect bank details, delayed payouts, and account-related issues for users.
- **Payment & Webhook Troubleshooting**: Investigated failed transactions, webhook delivery issues, and settlement failures by tracing requests through logs and API calls to identify root causes and drive them to resolution.
- **API & Integration Support**: Assisted merchants using payment links and API integrations, debugging authentication, callback URLs, and integration errors to get them live quickly and reliably.

- **Built & Fixed**: Leveraged first-hand knowledge from building both the frontend and backend of the 2022 version of payouts.cash to reproduce bugs, verify fixes, and patch UI/config issues directly without unnecessary escalations.
- **Knowledge Base & Runbooks**: Authored and maintained support documentation, FAQs, and internal troubleshooting runbooks for common payout issues, reducing repeat tickets and improving resolution times.

Projects

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Architected a multi-tenant payment API integrating 3+ providers via adapter pattern for virtual accounts, KYC, and cross-border payouts. Implemented async processing with RabbitMQ/Bull and secured with JWT, rate limiting, and structured logging.

Education

Alex Ekwuememe Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
