Professional Summary

Full-Stack Developer with 3+ years of experience taking web products from interface to infrastructure, including public-facing platforms, internal tools, and dashboards. Strong in TypeScript/JavaScript, React and Next.js on the front end, and Node.js, PHP, REST APIs, and relational databases on the back end. Comfortable with authentication and security fundamentals, third-party integrations, performance and SEO basics, testing, and supporting products after release. Works autonomously and communicates clearly in remote, cross-functional teams.

Skills

- **Languages**: TypeScript, JavaScript, PHP, HTML5, CSS3, SQL, Bash
- **Frontend**: React, Next.js, Vue, Tailwind CSS, Redux, Responsive Design, Accessibility (WCAG), Core Web Vitals, Technical SEO
- **Backend & APIs**: Node.js, Express.js, Fastify, PHP, Laravel, REST APIs, GraphQL, Authentication, Permissions, Validation, Webhooks
- **Data**: PostgreSQL, MySQL, MongoDB, Redis, Schema Design, Query Optimization
- **Integrations**: Payment Gateways, Third-Party APIs, Analytics & Event Tracking, Reporting Systems, AI-Assisted Development
- **DevOps & Workflow**: Git/GitHub, Code Review, Automated Testing, CI/CD, Docker, Linux, Cloud Hosting, WordPress, Agile/Scrum

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Product Development**: Built and shipped responsive web applications and internal tools across React/Next.js front ends and Node.js services, from requirements through release and ongoing support.
- **Backend, APIs & Auth**: Developed REST and GraphQL APIs, authentication flows, and permission/validation layers connecting payment, identity, and internal systems.
- **Integrations & Automation**: Integrated third-party APIs, payment providers, and automation services, with monitoring and alerting that surfaced failures before users reported them.
- **Performance & Reliability**: Optimized SQL queries and schema design and improved application reliability and maintainability through refactoring, cutting average request latency by 20%.
- **Tests & Code Review**: Wrote tests and methodically investigated production issues, reviewed code, and documented technical decisions and operational procedures for the team.

Software Engineer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Product**: Architected a unified API layer consolidating several payment providers behind one interface used by multiple client applications.
- **Security & Reliability**: Implemented authentication, validation, and access controls, improving reliability to 99.9% uptime across production services.
- **Testing & CI/CD**: Introduced automated regression testing and CI/CD checks, reducing production issues by over 50% and making releases more predictable.
- **Remote Collaboration & Documentation**: Worked remotely with product, design, and operations contributors, and documented troubleshooting and support procedures for existing applications.

Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Product Ownership**: Led end-to-end development of a payments product handling millions in monthly volume, from technical planning through release and support.
- **Frontend & Analytics**: Built a real-time analytics dashboard and embeddable widget adopted by 300+ clients, improving retention by 18%.
- **Database & Process**: Designed relational schemas and tuned MySQL/PostgreSQL queries, improving response times by 20%, and cut CI/CD pipeline duration by 20% while authoring API standards that reduced onboarding time by 40%.

Projects

RateLimitr (TypeScript, React, Fastify, PostgreSQL/TimescaleDB, Redis) *2024*

- Built a full-stack multi-tenant rate-limiting platform with a React dashboard and an LLM-powered assistant that answers tenant usage questions in natural language, handling 10,000+ RPS across 50+ nodes.

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payment API integrating 3+ providers via an adapter pattern for virtual accounts, KYC, and cross-border payouts. Secured with JWT, rate limiting, and structured logging.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
