## Professional Summary

Technical Support / Support Engineer with 3+ years troubleshooting REST APIs, integrations, and production issues for SaaS/B2B customers. Skilled in cloud-log investigation, Python and SQL diagnostics, telephony integrations, and partnering with engineering on complex, customer-blocking problems. Hands-on supporting AI/LLM-powered features, including a natural-language assistant over live product data.

## Skills Summary

- **Support Engineering**: API & Integration Troubleshooting, Production Log Investigation, Incident Triage, Escalation, Root-Cause Analysis, SLA Management
- **APIs & Integrations**: REST APIs, Webhooks, Twilio, Postman, cURL, OpenAPI/Swagger, Authentication (OAuth/JWT), Third-Party Integrations, Payment Providers
- **Telephony**: Twilio API, Voice & Messaging Integrations, Webhook Delivery Debugging, Call/SMS Delivery Troubleshooting
- **Diagnostics**: Python, SQL, Bash, Log Analysis, Error Tracing, Structured Logging, Performance Investigation, Reproduction Steps
- **Cloud & Monitoring**: GCP Cloud Logging, AWS, Sentry, Grafana, Datadog, PagerDuty, Docker, Linux, CI/CD
- **AI & Product**: LLM-Powered Features, Natural-Language Assistants, Prompt/Response Debugging, Usage Analytics & Reporting

## Experience

**Backend Engineer** *Oct 2024 - Present*
**Taja** *Lagos, NG*

- **API & Integration Support**: Supported enterprise customers and partners integrating payment and identity-verification APIs, diagnosing request failures, authentication errors, and webhook delivery issues to first resolution.
- **Telephony Integration Support**: Supported Twilio voice and messaging integrations, troubleshooting call and SMS delivery failures, webhook callbacks, and configuration issues reported by customers.
- **Production Issue Investigation**: Investigated production issues using application and cloud logs, error tracing, and monitoring dashboards, reducing mean time to detect and resolve customer-facing incidents.
- **AI/LLM Feature Support**: Supported LLM-powered natural-language features including an AI assistant over tenant usage data, debugging retrieval and response quality issues reported by customers.
- **Engineering Collaboration & SQL**: Escalated complex cross-system issues to engineering and used SQL to reproduce reported problems against production data, documenting root causes in runbooks that reduced repeat tickets.

**Software Engineer (Contract)** *Oct 2025 - May 2026*
**Kite** *Lagos, NG*

- **Integration Troubleshooting**: Architected and supported a unified API layer across multiple payment providers, debugging integration failures and turning them into fixes and clear customer-facing explanations.
- **Production Reliability**: Investigated and resolved production issues across front end, back end, and integrations, reducing repeat incidents by over 50%.
- **Customer-Facing Communication**: Reproduced issues with customers and operations teams and explained resolutions in plain language, maintaining 99.9% uptime and authoring support documentation that reduced repeat contact volume.

**Technical Support / Software Engineer** *May 2023 - Nov 2024*
**LocalRamp** *Lagos, NG*

- **Customer Technical Support**: Provided end-to-end technical support for 300+ enterprise customers integrating a payments gateway, troubleshooting API connectivity, webhook delivery, and transaction failures.
- **Triage & Escalation**: Ran a structured triage and escalation workflow, prioritizing issues by severity and cutting average resolution time from 48 hours to under 12 hours.
- **GCP Log Troubleshooting**: Investigated production issues using GCP Cloud Logging and monitoring dashboards, tracing errors across services and confirming fixes against live traffic.
- **Data & Knowledge Base**: Used SQL and scripting to trace transaction data and confirm fixes, and authored API documentation and troubleshooting guides that cut customer onboarding time by 40% and recurring ticket volume by 25%.

## Projects

**RateLimitr (TypeScript, Fastify, Redis, TimescaleDB)** *2024*

- Multi-tenant rate-limiting service with an LLM-powered natural-language assistant over live usage data, plus real-time analytics dashboards.

## Education

**Alex Ekwueme Federal University, Ebonyi State, Abakaliki** Ebonyi, Nigeria
*Bachelor of Science - Computer Science; GPA: 3.5*
