Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **End-to-End Feature Development**: Built and shipped full-stack features across React/Next.js interfaces and Node.js/Express APIs, from concept through deployment, with a focus on clean UX and fast iteration.
- **API & Performance Optimization**: Defined data contracts with frontend and UI engineers and optimized data-fetching patterns and API responses, cutting client-side request latency by 20%.
- **Secure Authentication**: Integrated secure authentication flows and encrypted local storage, ensuring strict data privacy and seamless app-unlock experiences for users.
- **Monitoring & Developer Experience**: Built internal tools and monitoring workflows that helped frontend and operations teams ship faster and debug production issues proactively.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with the unified backend API.
- **UI Components**: Translated complex financial data flows into responsive UI components, improving onboarding and transaction completion experiences.
- **Secure Mobile UX**: Designed secure mobile UX patterns with encrypted local storage and consistent authentication states across app-launch and unlock flows.
- **Quality & Testing**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50% in the first quarter.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **Fiat-to-Crypto Gateway**: Led frontend development of a high-volume, PCI-DSS-compliant gateway processing millions in monthly transaction volume, integrated with KYC/AML verification workflows.
- **Full-Stack Delivery**: Designed and maintained RESTful APIs, integrated payment and identity providers with automatic failover, and optimized SQL queries and schemas to improve response times by 20%.
- **Analytics Dashboard**: Built a real-time analytics dashboard for operations teams and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **Accessibility & UX**: Brought onboarding and payment flows to WCAG 2.2 AA compliance with ARIA labelling and keyboard navigation; partnered with UX designers to improve layouts, increasing user adoption by 12%.

Projects

RateLimitr (TypeScript, React, Fastify, Redis, TimescaleDB) *2024*

- Led frontend architecture for a rate-limiting platform handling 10,000+ RPS across 50+ nodes, and built an AI-powered natural-language analytics assistant. Designed prompt workflows and evaluated responses against representative tenant queries to improve answer accuracy.
