Professional Summary

Technical Support Specialist with 3+ years of experience supporting enterprise clients on SaaS and fintech platforms. Skilled in first-line troubleshooting via email, chat, phone, and virtual meetings; diagnosing API, webhook, and notification-delivery issues; documenting resolutions; and escalating bugs with clear reproduction steps. Client-centric and quick to learn, with a strong interest in deepening Salesforce administration and configuration expertise to support Mogli's SMS and WhatsApp application.

Skills Summary

- **Support & Communication**: Email, chat, phone, video conferencing, remote troubleshooting, client education, escalation
- **CRM & Ticketing**: Salesforce Cases (case management, basic administration/configuration), Zendesk, Intercom, Jira, Confluence
- **Technical Diagnostics**: REST APIs, webhooks, HTTP/JSON, Postman, cURL, SQL, log analysis, Browser DevTools, SMS/email delivery troubleshooting
- **Documentation**: Knowledge base, runbooks, troubleshooting guides, release notes, client-facing content
- **Practices**: L1/L2 triage, SLA management, root-cause analysis, release testing, QA, cross-team collaboration
- **Languages**: English (fluent), Yoruba (native)

Experience

Backend Engineer *Oct 2024 - Present*
Taja *Lagos, NG*

- **Client Support & Troubleshooting**: Provided first-line and escalated support to enterprise partners integrating payment and identity-verification APIs, resolving connectivity, webhook, and transaction issues via email, chat, and virtual meetings.
- **API & Delivery Diagnostics**: Reproduced client-reported failures with Postman and cURL, inspected HTTP status codes and JSON payloads, and traced requests through logs and monitoring to isolate root cause.
- **Escalation & Knowledge Base**: Prepared reproduction-ready Jira tickets with raw payloads, log snippets, and SQL evidence; documented recurring fixes in runbooks and knowledge-base articles, reducing repeat tickets.
- **Release Testing & Monitoring**: Maintained production monitoring and alerting, tested new releases, verified bug fixes, and documented feature changes before rollout.

Software Engineer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Application Troubleshooting**: Debugged cross-platform application issues reported by users, isolating state-management and real-time synchronization failures against backend APIs using logs and Browser DevTools.
- **QA & Release Verification**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50%; tested new versions in demo environments and confirmed fixes.
- **Client Collaboration & Documentation**: Worked with support and operations teams to reproduce and resolve production issues; authored troubleshooting guides and developer documentation for client-facing teams.

Software Engineer / Technical Support *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **B2B Client Support**: Delivered end-to-end technical support for 300+ enterprise clients on a multi-tenant platform, handling first-line requests via email, chat, and calls across configuration, data, and integration issues.
- **Data & Configuration Verification**: Used admin panels and read-only SQL to verify user states, event records, and configuration settings, distinguishing data issues from product defects.
- **Log & API Diagnostics**: Located root causes by searching microservice logs with user IDs and correlation keys; reproduced API and webhook failures with Postman and cURL; verified SMS and email notification delivery.
- **Escalation & SLA**: Prepared clear, reproduction-ready bug reports for engineering with raw payloads, SQL records, and log snippets; met response/resolution SLAs and reduced average resolution time from 48 hours to under 12 hours.
- **Knowledge Base & Mentorship**: Authored runbooks, checklists, and client-facing troubleshooting guides that cut onboarding time by 40% and recurring tickets by 25%; mentored junior technicians on triage and escalation.

Projects

Synapse (TypeScript, Express, MongoDB, Redis) *2025*

- Multi-tenant payment API integrating 3+ providers; added structured logging, correlation IDs, and webhook retries so support teams could trace and diagnose delivery failures end to end.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Relevant Coursework**: Operating Systems, Networking, Databases, Data Structures, Algorithms
