Professional Summary

Frontend-focused Full-Stack Developer with 3+ years of experience shipping React and TypeScript interfaces for high-traffic B2B platforms. Strong in component design, state management, REST API integration, Tailwind CSS, responsive layouts, accessibility, and performance. Comfortable owning features from issue to reviewed pull request, debugging across the stack, and improving codebases through refactoring and code review. Eager to grow into PHP/Laravel and Astro while contributing strong frontend fundamentals to Pine Hosting.

Skills

- **Languages**: TypeScript, JavaScript, HTML, CSS, SQL
- **Frontend**: React, Next.js (SSR/SSG), Tailwind CSS, Redux, TanStack Query, React Router, Responsive Design, Accessibility (WCAG/ARIA), Design Systems
- **Backend & APIs**: Node.js, Express.js, REST APIs, GraphQL, Authentication, Webhooks, Service Integration
- **Testing & Debugging**: Jest, Vitest, React Testing Library, Playwright, Cypress, Browser DevTools, Network Inspection, Sentry
- **Workflow**: Git/GitHub, Branches & Pull Requests, Code Review, CI/CD, Docker, AWS, VS Code, GitHub Copilot, Cursor, Linear/Jira
- **Performance**: Core Web Vitals, Performance Optimization, Semantic HTML, Cross-Browser Testing, SEO-Aware Frontend Development

Experience

Full Stack Developer *Oct 2024 - Present*
Taja *Lagos, NG*

- **React & TypeScript Feature Development**: Built and maintained customer-facing features in React/Next.js and TypeScript, including reusable components, hooks, and state management for data-heavy workflows.
- **REST API Integration**: Integrated REST APIs and designed data contracts, optimizing data-fetching patterns and response structures to cut client-side latency by 20%.
- **Code Quality & Review**: Wrote unit and integration tests, participated in code reviews, and built monitoring workflows that helped the team ship faster and debug production issues.
- **Product Collaboration**: Partnered with product managers and designers to scope features, validate workflows with users, and iterate on feedback across the stack.

Frontend Developer (Contract) *Oct 2025 - May 2026*
Kite *Lagos, NG*

- **Cross-Platform React Frontend**: Co-developed a cross-platform frontend, implementing state management and real-time synchronization with a unified backend API.
- **Responsive & Accessible UI**: Translated complex financial data flows into responsive, accessible components, improving onboarding and transaction completion experiences.
- **Testing & Bug Fixes**: Introduced automated regression testing across critical flows, cutting production bug escapes by over 50%; investigated and fixed issues across the stack.
- **Async Collaboration & Documentation**: Worked with support and operations teams to reproduce issues and authored troubleshooting guides and developer documentation.

Full Stack Software Engineer *May 2023 - Nov 2024*
LocalRamp *Lagos, NG*

- **High-Traffic B2B Frontend**: Led frontend development of a high-volume, PCI-DSS-compliant payments platform used by 300+ enterprise clients.
- **Analytics Dashboard & Widget**: Built a real-time analytics dashboard and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
- **Accessibility & UX**: Brought onboarding and payment flows to WCAG 2.2 AA compliance with ARIA labelling and keyboard navigation; partnered with UX designers to improve layouts, increasing adoption by 12%.
- **Performance & Modernization**: Optimized SQL queries and schemas, improving response times by 20%, and reduced CI/CD pipeline duration by 20% by streamlining build and deployment stages.
- **Code Review & Standards**: Authored API design standards and contributed to code reviews and onboarding materials that cut new engineer onboarding time by 40%.

Projects

RateLimitr (TypeScript, React, Fastify, PostgreSQL/TimescaleDB, Redis) *2024*

- Led frontend architecture for a full-stack rate-limiting platform handling 10,000+ RPS across 50+ nodes, built with React, Fastify, PostgreSQL/TimescaleDB, and Redis. Added real-time analytics and an AI-powered natural-language assistant for tenant usage insights.

Education

Alex Ekwueme Federal University, Ebonyi State, Abakaliki Ebonyi, Nigeria
Bachelor of Science - Computer Science; GPA: 3.5

- **Courses**: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
