Lekki, Lagos

Professional Summary

Software Engineer with 3 years of experience developing scalable fintech solutions using TypeScript, JavaScript, and React. Skilled at collaborating with cross-functional teams to deliver projects that enhance user satisfaction and performance.

Skills

- **Languages**: TypeScript, JavaScript, SQL
- **Frameworks**: React, Next.js, Node.js, Tailwind CSS, Redux, TanStack Query, React Router
- **Data & APIs**: GraphQL, REST
- **Testing**: Jest, Vitest, React Testing Library
- **Tools**: Docker & Kubernetes, Redis, MongoDB, CI/CD
- **Methodologies**: Agile / Scrum, System Design

Experience

- **Full Stack Developer, Taja** Lagos, NG
  Oct 2024 - Present
  - **Frontend Collaboration**: Collaborated with the frontend team to define data contracts and API shapes that reduced client-side data fetching by 20%, improving page load and rendering performance across web and mobile products.
  - **Frontend Performance**: Worked with UI engineers to optimize data-fetching patterns and API responses, cutting client-side request latency and delivering faster, more responsive user interfaces.
  - **Secure Authentication**: Integrated secure authentication flows and encrypted local storage, ensuring strict data privacy and seamless app-unlock experiences for users.
  - **Developer Experience**: Built internal tools and monitoring workflows that helped frontend and ops teams ship faster and debug issues in production.

- **Frontend Developer (contract), Kite** Remote, Lekki, Lagos
  Oct 2025 - May 2026
  - **Cross-Platform Frontend**: Co-developed the cross-platform mobile frontend, implementing state management and real-time synchronization with the unified backend API.
  - **UI Components**: Translated financial data flows into responsive UI components, improving onboarding and transaction completion experiences for users.
  - **Secure Mobile UX**: Designed secure mobile UX patterns with encrypted local storage and consistent authentication states across app-launch and unlock flows, preserving data privacy without disrupting the user experience.

- **Full Stack Software Engineer, LocalRamp** Remote, Lekki, Lagos
  May 2023 - Nov 2024
  - **Fiat-to-Crypto Gateway**: Led the frontend development of a high-volume, secure fiat-to-crypto gateway processing millions in monthly transaction volume, fully compliant with PCI-DSS standards and integrated with KYC/AML user verification workflows.
  - **Analytics Dashboard**: Built a real-time analytics dashboard for operations teams and an embeddable widget adopted by 300+ enterprise clients, contributing to an 18% improvement in retention.
  - **UX Collaboration**: Collaborated with UX designers to improve interface layouts, increasing user adoption by 12%.

Projects

- **RateLimitr**: Led the frontend architecture and interface design for an enterprise-grade rate-limiting platform, capable of handling 10,000+ RPS across 50+ nodes and delivering real-time security analytics to over 10,000 concurrent tenants.
- **LocalRamp Web Wallet**: Shipped frontend features for a PCI-DSS-compliant fiat-to-crypto wallet, including onboarding flows, transaction history views, and embeddable payment widgets used by enterprise clients.

Education

- **Alex Ekwuememe Federal University, Ebonyi State, Abakaliki** Ebonyi, Nigeria
  Bachelor of Science - Computer Science; GPA: 3.5 *Jan 2021 - Oct 2025*
  Courses: *Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases*
